

A decorative border of colorful butterflies (purple, orange, and black) surrounds the text. The butterflies are arranged in a grid-like pattern, with a single row at the top and bottom, and vertical columns on the left and right sides.

Naming Butterflies...

Kingdom, phylum, class and order-
Words like “Hymenoptera-”
If they fly on scaly wings
They must be Lepidoptera.

Butterflies and moths fit here,
According to my journal.
Butterflies are seen by day;
But moths are more nocturnal.

Families are Swallowtails,
Brushfoots, Milkweed whoppers,
Skippers, White and Sulfur hued,
Hairstreaks, Blues and Coppers.

Genuses are trickier,
And species go forever;
So I just use the common names,
Because I’m not that clever.
